

Unified HR & Payroll Architecture

Integration Blueprint: Zoho People (Core HR Master) + Payobook (Operations & Payroll Platform)

System Design Specification • Unified Employee Portal • Single Directional Data Governance

1. Architectural Intent & Model Classification

The system is architected around a unified user experience where underlying engine boundaries remain invisible. System ownership is classified cleanly across three core operational models:

2. Unified HR Portal & Navigation Experience

Employees and managers interact with a single interface. Navigation represents functional domains without exposing underlying vendor platforms.

3. Detailed Module Functional Ownership

3.1. Hybrid Lifecycles: Onboarding & Offboarding

Process	Zoho People Ownership	Payobook Ownership
Onboarding & Orientation	• Employee creation & Master ID assignment • Department, Designation & Reporting Line • Joining verification & HR document collection • Orientation activity tracking	• Asset assignment & dispatch configuration • Payroll & compensation structures setup • Statutory tax/benefit profile configuration • System/Vendor access provisioning
Offboarding & Exit Clearance	• Resignation initiation & Manager approval • HR exit interview & documentation • Employment status change to 'Terminated' • Comprehensive status dashboard reflection	• Asset recovery & physical condition check • System & vendor access automated revocation • Full & Final (F&F) calculation & deductions • Outstanding loan clearance & final payslip

3.2. Payobook-Owned Operational & Performance Modules

Module	Payobook Responsibilities (Functional Master)	Zoho People Integration Role
Asset Management	Full asset lifecycle: catalog, serial number, value, warranty, assignment, condition, transfer, and recovery.	Displays assigned asset inventory read-only on Employee Profile via integration widget.
Probation Management	Executes probation milestones: Manager reviews, peer feedback, HR review, extension, confirmation, or exit decision.	Provides core DOJ & manager data; receives final probation status update (Confirmed / Extended).
Performance Improvement (PIP)	Manages PIP creation, SMART improvement objectives, action plans, periodic check-ins, HR reviews, and final outcome.	Maintains overall employment record; displays unified performance milestone status.
Payroll, Comp & Benefits	Authoritative engine for compensation structures, salary revisions, allowances, calculations, payslips, bank files, and tax.	Displays embedded payslip links and compensation summaries on the unified dashboard.
Vendor & Access Mgmt	Vendor contracts, software licenses, tool costs, access provisioning requests, renewal dates, and security revoking.	Triggered automatically upon Zoho joining/resignation event hooks.
Rewards & Recognition (RnR)	Manages peer/manager recognition programs, reward approval flows, and direct integration of monetary awards into payroll.	Optionally displays peer shout-outs on internal team feed.
Budget Management	Departmental budgets, headcount cost forecasting, compensation increase models, hiring budget variance, and actual vs budget.	Consumes headcount headcount planning metrics.
Contract Employee Mgmt	Contractor tracking, agency masters, contract terms, billing rates, hourly tracking, renewals, and supplier invoicing.	Maintains person profile for ID badges/physical access where applicable.

4. Data Governance & Single Directional Sync Model

To eliminate synchronization conflicts, race conditions, and circular loops, every field has a **single authoritative master** with strictly one-way propagation:

Data Entity / Field	Authoritative Master	Sync Direction	Integration Mechanism & Trigger
Employee Core (ID, Name, Email, DOJ, Dept, Manager)	Zoho People	Zoho → Payobook	Webhook on Create / Update (Real-time)
Employment Status (Active, Notice, Terminated)	Zoho People	Zoho → Payobook	Webhook on Status Transition Event
Salary Structure, Components & Revisions	Payobook	Payobook (Internal) / Link to Zoho	REST API sync / secure embedded iFrame view
Monthly Payroll Status & Generated Payslips	Payobook	Payobook → Zoho	Batch API post-payroll finalization
Probation Evaluation Outcome	Payobook	Payobook → Zoho	Webhook on Decision Approval (Confirmed/Failed)
PIP Outcome Status	Payobook	Payobook → Zoho	Webhook on PIP Committee Sign-off
Assigned Assets & Hardware Details	Payobook	Payobook → Zoho	REST API for Employee Profile Widget view
Exit Clearance Status (F&F, Asset Return, Access)	Payobook	Payobook → Zoho	Webhook update during offboarding checklist
Workforce Budgets & Vendor Contracts	Payobook	Payobook (Autonomous)	No sync required back to Zoho

5. Recommended Sheet-by-Sheet Implementation Blueprint

The structured specification for technical delivery across Zoho People and Payobook engineering teams:

Sheet / Module	Color	System Owner	Primary Data Owner	API Sync & Event Triggers	User Interface & Workflow
Employee Master	 White	Zoho People	Zoho	Zoho → Payobook (Real-time webhook)	Zoho Master Form & Org Chart; synced to Payobook partner record.
Onboarding	 Yellow	Hybrid (Shared)	Shared Flow	Bi-directional lifecycle event status	Unified task checklist displaying both HR docs and IT/Pay setup.
Asset Mgmt	 Green	Payobook	Payobook	Payobook → Zoho (Read-only API)	Full inventory tracking in Payobook; embedded list on Zoho profile.
Probation	 Green	Payobook	Payobook	Payobook → Zoho (Final status webhook)	30/60/90 day reviews in Payobook; updates employment record in Zoho.
PIP	 Green	Payobook	Payobook	Payobook → Zoho (PIP result webhook)	Milestone tracker in Payobook; logged against employee HR file.
Payroll & Comp	 Green	Payobook	Payobook	Payobook → Zoho (Payslip link sync)	Calculation & payout engine in Payobook; Payslip visible in portal.
Offboarding	 Yellow	Hybrid (Shared)	Shared Flow	Bi-directional milestone webhooks	Resignation starts in Zoho → triggers Payobook clearances & F&F.

Sheet / Module	Color	System Owner	Primary Data Owner	API Sync & Event Triggers	User Interface & Workflow
Vendor & Access	 Green	Payobook	Payobook	Zoho Lifecycle events → Payobook	Automatic access request on join, automated revocation on exit.
RnR	 Green	Payobook	Payobook	Internal to Payobook Payroll	Peer recognition with approved cash reward feeding monthly payroll.
Budget Mgmt	 Green	Payobook	Payobook	Headcount sync from Zoho	Department budget vs actual payroll variance & executive dashboard.
Contractors	 Green	Payobook	Payobook	Optional ID sync to Zoho	Agency vendor master, hourly timesheets, rates, and invoice clearance.

Key Architectural Success Factor:

By defining **Zoho People** as the core employment foundation and **Payobook** as the robust workforce operations, compensation, and governance platform, both systems operate within their core strengths without duplicated entry or bi-directional synchronization conflicts.
