

Payobook Global HRMS Architecture and Operating Blueprint

Production-ready global payroll and workforce platform

Payobook delivers integrated payroll and workforce operations through a secure six-layer platform. The technology framework is ISO/IEC 27001:2022 certified within the defined certificate scope and applies cloud firewall controls, multi-factor authentication, approved single sign-on, TLS 1.2/1.3, encryption at rest and encrypted backups.

AI and intelligence capabilities

Payobook provides AI-assisted analysis, rules-based evaluation, secure model orchestration and role-scoped insights. Local inference and document OCR support private processing within the approved hosting environment. Role permissions govern access, authorised users retain decision responsibility, and the private-processing profile blocks external provider, transcription and fallback routes.

Global HRMS operating blueprint

Governance

Indonesia

Specification

1. Global System Navigation Blueprint

The system navigation hierarchy is structured to support multi-entity routing, multi-currency processing, and localized

compliance rules across all core HR functions:

Global Command & Dashboards

Executive C-Suite Overview (Consolidated Cross-Country & FX)

Regional / Country Dashboard (India, Vietnam, Singapore, Indonesia)

Functional Dashboards (Hiring, OKR, LnD, Payroll, Attendance)

Universal Approvals Inbox (Unified SLA tracker, escalations, batch sign-offs)

Social Hub & Internal Comms

Live Activity Feed & Company Mood Board (Synced with Slack/Email)

Value-Linked Peer Recognition & Rewards (RnR)

Automated Milestone Celebrations (Birthdays, Anniversaries, New Hires)

Country-Specific Announcements & Policy Updates (With 2-day edit lock)

Organization & Structure (Core HR)

Multi-Entity Hierarchy & Visual Org Chart (Matrix & solid/dotted lines)

Department, Function & Cost Center Mapping

Master Employee Directory (Full-time, Field/Agronomist, Expat, Intern)

Document Vault & File Center (KYC, Education, Signed Contracts)

Global Policy & Handbooks (Multi-language, country compliance sign-offs)

Employee Self-Service (ESS) & Operations

My Profile & Employment Timeline

Claims, Allowances & Travel Reimbursements

Self-Service Letter Desk (Proof of employment, address verification, tax docs)

Asset Possession & Condition Check (Hardware confirmation)

Confidential Grievance & Ticketing Desk (POSH, HR disputes)

Talent Acquisition & Hiring

Manpower Requisition (MR) & Live Budget Validation

Job Postings & External Board Integrations (LinkedIn, portals)

Candidate Pipeline, Resume Bank & Screening Dashboard

Interview Hub (Google Calendar sync, 24h feedback SLAs, no-show/reschedule logs)

Referral Portal & Internal Mobility Tracker

Employee Lifecycle Operations

Pre-Onboarding & Automated Buddy Nomination (Tenure/role validation)

Day-1 Orientation & IT Asset Handover

Probation Management (21-day auto-triggers, 360 peer feedback, 1:1 verdict)

PIP & Coaching Desk (Action plans, bi-weekly reviews, exit/retention trigger)

Contract & Intern Hub (60-day expiry notifications, extensions, full-time conversion)

Offboarding (Resignations, KT handovers, asset recovery, No-Due, F&F, experience letters)

Time, Leave & Attendance

Field & Office Attendance (Geo-tagging & facial recognition for agronomists)

Multi-Country Holiday Calendars (India, VN, SG, ID)

Leave Applications, Multi-Level Approvals & 2-Day HR Escalation

Leave Balance Engine & 6-Month Carry-Forward Expiry Alerts

Performance & Learning (LnD)

OKR & Goal Setting (KR weightages, Day-1 triggers, monthly check-ins, HR lock-in)

Agronomist Technical LMS (Video modules, question bank, mandatory scored tests)

Probation-Linked & Compliance Training (POSH, Safety, Code of Conduct)

Employee Training Budget Management (Invoices, certificates & reimbursements)

Payroll, Compensation & Benefits

Employee Compensation Structure (Salary breakup, tax deductions, local currency)

Monthly Payslip Repository (Employee self-download, HR access control)

Payroll Cut-Off Management & Vendor Input/Output Integrations

Multi-Country Statutory Engine (PF/ESI/TDS, CPF, Social Insurance/PIT, BPJS)

Incentive & Variable Pay Allocation Desk

Finance & Banking Settlement Integration

Assets, Facilities & Vendors

Tangible Asset Master (Laptops, SIMs, Mobiles, ID cards, scrap tracking)

Intangible Asset Master (HRMS access, approved productivity-suite identities, software licenses)

10–15 Day Pre-DOJ Procurement & Exit Recovery Clearance

Vendor Contract Repository (Agreements, validity tracking, expiry reminders)

Functional Manpower & HR Operations Budgeting (Forex conversion & variance analysis)

System Administration & Governance

Role-Based Access Control (RBAC) & Granular Matrix Permissions

Out-of-Office Temporary Role Delegation & Reassignment

Workflow Automation Studio (Triggers, conditional logic, email/Slack templates)

Bulk Data Studio (Standardized Excel/CSV import, schema validation, export logs)

Global Security, Audit Logs & Data Residency Settings (DPDP, PDPA, Decree 53)

2. End-to-End Module Specifications

Core HR & Organizational Structure

- Interactive Visual Org Chart: Displays comprehensive reporting hierarchies with native support for cross-border

matrix relationships (e.g., solid-line reporting to an SG Function Head, dotted-line reporting to a Vietnam Country Manager).

- Master Directory & File Vault: Centralized global database for full-time employees, contractors, interns, and field

personnel. Stores identity verification, tax forms, education certificates, and digital contracts with strict country-level

permission partitioning.

- Document Desk & Dynamic Templates: Automated letter generator leveraging dynamic merge tags

{{employee_name}} {{designation}} {{ctc_breakup}} for instant creation of offer letters, probation confirmation deeds, bonus letters, and full & final (F&F) relieving certificates.

Hiring & Requisition Management

- Budget-Governed Requisitions: Exclusively raised by Function Heads. Automatically validates headcounts against approved department budgets, triggering instant variance alerts to HR and Finance if limits are exceeded.
- Interview Operations & SLA Tracking: Real-time synchronization with Google Calendar, automated 24-hour and 30-minute candidate/panel reminders, no-show logging, and an enforced 24-hour feedback submission timer.
- Resume Bank: Centralized talent vault categorizing screened candidates into shortlisted, rejected, future-fit, and

cross-functional mappings across multi-country positions.

Lifecycle Management (Onboarding to Offboarding)

- Pre-Onboarding & Buddy Engine: Automatically triggered upon offer acceptance. Enforces buddy eligibility (≥6

months tenure, confirmed out of probation, same regional context) and schedules structured onboarding check-ins.

- Probation Governance: Auto-triggers review workflows 20–21 days prior to completion. Collates 3–5 peer evaluations, consolidates ratings, and guides managers through a structured 1:1 decision (Pass / Extend / Fail).

- PIP & Structured Coaching: Formalized performance improvement protocol featuring structured pre-PIP coaching plans, bi-weekly milestone check-ins, and automated exits if benchmarks are not met.
- Contract & Intern Hub: Automated 60-day expiry notifications with guided management workflows: Contract Extension, Separation, or Transition to Full-Time.
- Exit & Settlement Desk: Self-service resignation desk, 15-day KT progress tracking, mandatory tangible/intangible asset return clearances, full-and-final settlement automation, and post-exit tax compliance distribution.

Time, Attendance & Field Operations

- Agronomist Field Tracker: Geofenced mobile attendance system paired with facial recognition designed specifically for distributed agricultural and field personnel.
- Multi-Country Holiday Calendar: Regional calendar engine showing country-specific public and statutory holidays across Vietnam, India, Singapore, and Indonesia.
- Leave Balances & Escalations: Automated accruals and carry-forwards with a strict 2-day manager SLA escalation to HR and proactive alerts for double carry-forward leaves 6 months prior to expiry.

Performance, Learning & OKRs

- Goal/OKR Engine: Auto-triggered upon Day 1 with an enforced 2-week submission timeline, manager weightage scoring, monthly progress check-ins, and an immutable HR lock-in audit trail.
- Agronomist LMS: Mandatory training modules containing video content, completion tracking, question bank administration, and instant post-assessment scorecards.
- Employee Learning Budgets: Self-directed annual learning allocation allowing staff to submit course invoices and completion certificates for reimbursement.

Compensation, Statutory & Payroll Operations

- Employee Compensation View: Transparent breakdown of CTC, allowances, tax deductions, and health insurance policy entitlements.
- Payroll Processing Engine: Cut-off date enforcement, vendor exchange file automation, two-stage approval workflow (HR & Finance), and monthly payslip publishing.
- Statutory Compliance Engines: Country-native statutory calculation modules for India (PF, ESI, TDS), Singapore (CPF, IR8A), Vietnam (PIT, Social Insurance), and Indonesia (BPJS).

Assets, Vendors & Operations Budgeting

- Asset Tracking: Unique Asset IDs assigned to tangible items (laptops, phones) and intangible assets (approved productivity-suite identities, HRMS credentials), integrated with 10–15 day pre-DOJ procurement and offboarding recovery

checks.

- Vendor Operations: Comprehensive vendor contract database tracking SLA timelines, owner assignments, and

automated alerts for contract expirations and renewals.

- Budget Management: Tracks function-wise manpower budgets and HR operational expenditures against monthly actuals, supporting manual exchange rate updates for consolidated USD reporting.

Governance, Workflows & Platform Utilities

- Unified Approvals Inbox: Centralized task inbox aggregating leave requests, MR approvals, expense claims, probation decisions, and PIP reviews with batch-processing capabilities.
- Temporary Role Delegation: Authority reassignment framework allowing managers on leave to delegate approval powers temporarily while maintaining audit logs.
- Bulk Data Studio: Standardized Excel/CSV upload utility with pre-commit validation to import employees, compensation structures, attendance records, and assets.
- Data Privacy & Localization: Role-based access partitions ensuring country HR can only access records relevant to their jurisdiction, in compliance with GDPR, Singapore PDPA, India DPDP, and Vietnam Decree 53.

Client options to extend scope

Clients can widen the agreed scope with the following modules and service options:

- Additional countries, legal entities, currencies, statutory engines and data-residency arrangements.
- Recruitment, onboarding, learning, performance, expenses, asset management, vendor management and offboarding.
- Additional approved integrations, identity lifecycle automation, single sign-on and privileged multi-factor authentication.
- Advanced analytics, scheduled reporting, controlled exports and role-scoped management dashboards.
- Private AI processing, local OCR, domain-specific rules-based evaluation and additional role-scoped AI workflows.
- Enhanced resilience, independent backup copies, recovery objectives, monitoring and customer-specific assurance evidence.

Each extension is included through the agreed solution scope, with its data flows, roles, security controls, acceptance criteria, rollout plan and support commitments documented before production use.
